How do you store and maintain your spare motors?
The IPS Cleveland Service Center provides critical spares storage and management as part of our single-source capabilities. In addition to 25-plus years of experience in storing and managing rotating assets, we offer the following:

- Clean 15,000 sq. ft. warehouse
- 30-ton lifting capacity
- Heated environment
- Shaft rotation and testing to customer specification
- Security and fire protection systems
- 24/7 on-call service for fast shipment
- IPS rewind warranty starts at time of shipment
- Full documentation on motor inventory and maintenance history to customer specification

IPS critical spares storage and management reduces both unplanned downtime and capital investment in inventory, while integrating seamlessly with your plant MRO and reliability programs. For more information, contact the Cleveland Service Center at 800.433.7801 or visit www.ips.us/cleveland.
FULL DOCUMENTATION
This is a critical part of IPS QA, providing you proof in writing of our test and maintenance procedures. Our ISO-compliant documentation ensures consistency and continuity, so that IPS service technicians always follow approved methods for storing and managing your rotating assets. These documented processes reinforce our commitment to quality and aligns our services with your MRO, reliability and disaster recovery programs.

SCHEDULED MAINTENANCE AND TESTING
In addition to maintaining conditions that mitigate the effects of temperature changes and damage from moisture, airborne contaminants or vibrations, we also offer regular maintenance and testing to ensure that your spares will operate. This includes shaft rotation and windings meggered to customer specification.

IPS also provides additional regular maintenance upon request, such as nitrogen purges on equipped motors, energizing space heaters, and MCE testing.

24/7 SERVICE AND DELIVERY
The IPS Cleveland Service Center offers 24/7 service and delivery, so your spare motors and generators are available at a moment’s notice. Our field service technicians are ready to roll, delivering your spares and then installing and aligning them.

We understand the costs associated with unplanned downtime, so we mobilize quickly and efficiently to have your operations back online as soon as possible.

THE INDUSTRY’S LEADING REWIND WARRANTY
MegaSeal™, our premium VPI high-voltage engineered insulation system, and PowerSeal™, our premium VPI medium-voltage engineered insulation system, both feature a five-year warranty.
