

# PHILADELPHIA ASSET MANAGEMENT PROGRAM

*Professional management of small and large critical rotating assets*

*Reliability. Delivered.*

*The IPS Philadelphia Service Center has extensive experience in the professional storage and management of large and extra-large motors and generators*

## How do you store and maintain your spare motors?

The IPS Philadelphia Service Center provides critical spares storage and management as part of our single-source capabilities. In addition to 25-plus years of experience in storing and managing rotating assets, we offer the following:

- Clean 16,000 sq. ft. warehouse
- 50-ton lifting capacity
- Heated environment
- Free of any resonant vibrations (protects bearings)
- Monthly shaft rotation
- Windings Meggered quarterly
- 24/7 on-call service for fast shipment
- IPS rewind warranty starts at time of shipment
- Full documentation on motor inventory and maintenance history to customer specification

*Our program also includes all size critical assets*

## FULL DOCUMENTATION

This is a critical part of IPS QA, giving you proof in writing of our test and maintenance procedures. Our ISO-compliant documentation ensures consistency and continuity, so that IPS service technicians always follow approved methods for storing and managing your rotating assets. These documented processes not only reinforce our commitment to quality and service, they also help our services align with your MRO, reliability and disaster recovery programs.

*Documented testing and maintenance keep your critical spares ready to ship 24/7*

## SCHEDULED MAINTENANCE AND TESTING

In addition to maintaining precise environmental conditions that prevent temperature changes and damage from moisture, airborne contaminants or vibrations, we also offer regular maintenance and testing to ensure that your spares will run when needed. This includes monthly shaft rotation and quarterly Megger tests for windings.

*We rotate shafts on a monthly basis (or to customer specification)*

IPS also provides additional regular maintenance upon request, such as nitrogen purges on equipped motors, energizing space heaters, and MCE testing.

## 24/7 SERVICE AND DELIVERY

The IPS Philadelphia Service Center offers 24/7 service and delivery, so your spare motors and generators are available at a moment's notice. Our field service technicians are ready to roll, delivering your spares and then installing and aligning them. We understand the costs associated with unplanned downtime, so we mobilize quickly and efficiently to have your operations back online as soon as possible.

*Coils are Meggered quarterly (or to customer specification)*

## THE INDUSTRY'S LEADING REWIND WARRANTY

MegaSeal™, our premium VPI high-voltage engineered insulation system, and PowerSeal™, our premium VPI medium-voltage engineered insulation system, both feature a five-year warranty. Our warranty begins when your motor ships from storage, no matter how many years we store it for you.
