ELIN Motoren manufactures wind turbine generators between 600-5300kW, with an installed base of several thousand units in the U.S. (ELIN 2.5 MW wind generator pictured above)

The IPS Service Center in Litchfield, MN, a leading provider of wind generator repair, is the authorized service partner for ELIN Motoren in North and South America. IPS Litchfield, one of the many IPS regional service centers located across North America, leads and manages IPS wind power services, including repair standards, repair services, field services and distribution for wind power customers.

IPS Litchfield provides authorized service, warranty and non-warranty repair, OEM parts and exchange wind generators for ELIN. These services are offered in both North and South America, including generator installation and removal, stator and rotor rewinds, inspection and cleaning, bearing changes up-tower and in-shop, electrical tests, vibration and noise measurement, and balancing.

ELIN adds its name to the growing list of leading OEMs that look to IPS for both warranty and non-warranty repair. In return, the IPS Service Center in Litchfield, MN offers ELIN a proven single-source approach to OEM-spec service and repair for its wind generators.
