

CNC PRECISION PARTS

Fast, quality parts from electric motor experts

*Reliability.
Delivered.*

CNC machined parts include, but are not limited to the following: bearing sleeves, shafts, stub shafts, fans, insulators, cable clamps, slip rings, brush holders, stainless screws...

- *Machined materials include:*
 - » *Steel and Stainless Steel*
 - » *Bronze*
 - » *Aluminum*
 - » *Plastic*
 - » *Insulation (e.g. G10)*
 - » *Hardened up to 60 Rockwell*
- *Parts dimensions:*
 - » *Shafts up to 80" long*
 - » *Turn diameters up to 23"*
 - » *Milling up to 20" x 40" plate*
- *Additional CNC shop capabilities:*
 - » *Parts reverse engineering*
 - » *Coordinate measuring machine (CMM)*
 - » *Hardness testing*
 - » *CAD-CAM 3D drawings*
 - » *Digital bore gauges*
 - » *Hole drilling and tapping*
 - » *Flats and hex parts milling*
 - » *Keyways machining*
- *Small to medium-run lots*

IPS started manufacturing CNC precision parts in 1993 to support its core electric motor repair business. Initial manufacturing focused on sleeves for bearing housings; however, the business quickly expanded to shafts, stub shafts, fans and other critical electric motor parts. Today, our dedicated CNC facility in Indiana, PA not only supports the North American electric motor repair market, we also manufacture parts for various OEM's and distributors.

Our CNC facility has dedicated stock of high volume parts for our customers. When you buy CNC parts from IPS, you are buying the IPS system of control over quality and quantity. Our specialized CNC team is focused on customer service, and can deliver short lead times, planned production runs, and take on the complicated parts when your reputation is on the line. IPS is the unmatched leader in CNC parts for electric motors and other critical pieces of equipment. Contact us today!

Brown & Sharpe Coordinate Measuring Machine (CMM) ensures quality, precision machined parts.
