Our dedicated up-tower and in-shop technicians service Mitsubishi turbines coast to coast

IPS offers complete services on Mitsubishi 600, 1.0 and 2.4 Series wind turbines. Our technicians have developed innovative skills and technologies to keep the work up-tower. We're experienced at moving heavyweight couplings, end bells and slip rings, and doing machine work inside the Mitsubishi nacelle.

We also provide comprehensive in-shop repair services performed by qualified and experienced wind power technicians. No matter which IPS regional service center works on your Mitsubishi wind turbines, you can count on one standard of excellence for safety, quality and repairs—coast to coast.

All IPS up-tower technicians are trained to one safety standard across the entire company

UP-TOWER FIELD SERVICES

- Generator and gearbox repair
- Bearing changeouts and upgrades
- Slip ring changeouts, upgrades and turning
- Grounding system upgrades
- Rotor lead changeouts
- Housing and component rebuilds
- Brush holder upgrades
- Battery pack upgrades
- Predictive and preventive maintenance
 - Laser alignment
 - Vibration and Modal analysis
 - Thermography
 - Bore Scoping
- Diagnostic Testing
 - Baker Surge Test
 - Motor Circuit Evaluation (MCE)
 - Doble® and Partial discharge
- Scheduled maintenance programs
- End-of-warranty inspections
- Generator unit exchange program
- Emergency repairs

IN-SHOP REPAIR SERVICES

- Authorized OEM repair
- Electrical repair
 - Generators—rewind, recondition, mechanical and machining
 - Pitch and yaw motors
 - Oil pump motors
 - Cooling fans
 - Hydraulic pump motors
 - Electronic board repair
- Mechanical repair
 - Generator and gearbox housings
 - Main turbine gearboxes and gears
 - Yaw gearboxes
 - Main shafts
 - High-speed shafts
 - Slip rings
 - Heat exchangers
- Random-wound coil manufacturing up to 2m
- Premium VPI systems up to 15 kV

Up-tower field services, in-shop repairs and distribution

Products and parts sales

- Generator and gearbox components
- Generator couplings
- Grease and oil
- Encoders—hollow and solid shaft
- Power slip rings
- Pitch control and custom slip rings
- Bearings—Steel, Insocoat and Ceramic
- Pitch control battery pack upgrades
- Auto-lube systems
- Replacement motors—pitch, yaw, cooling pump and all metric motors
- Electronic boards
- Stator coils up to 15 kV

**In-house CNC precision
parts manufacturing**

- Shafts up to 22" and 80" long
- Milling up to 20" x 40" plate
- Drilling and tapping of holes
- Milling of flats and hex parts
- Machining keyways
- Cutting multiple parts and sizes up to 16" diameter
- Digital bore gauges
- CAD/CAM 3D drawings
